

My Memories Playlist

New Studies Show us that: Music aids language learning, helps injured brains remember, causes widespread brain activation, and in general has tremendous power over memory.

- * Sing the phrases of your language classes**
- * Connects to auditory, motor, and limbic regions of the brain.**
- * You can associate particular songs with important dates or times**

1. Choose 10 songs that create a “memorial timeline” of your life and explain the context for which they were stored in your memory.

Name of Song in Playlist:	Connection to Memory (Implicit or Explicit, Connection to Experience, Maintenance or Elaborative Rehearsal)
