

Endocrine System Practice

1. What does the endocrine system rely on to communicate?
2. "Little Mo" was extremely short for his age. His doctors concluded his brain was not stimulating the proper release of hormones necessary for growth. What area of the brain are they probably focusing on?
3. Jeremy and Drew seemed to always be hungry and their temperatures ran high.
4. Rodrigo and Kayla seemed to constantly be experiencing a "runner's high".
5. Mackenzie started growing much, much larger.
6. Zac and Kyle were uncontrollably thirsty.
7. Which gland of the endocrine system controls the other glands?
8. Endocrine glands secrete hormones directly into
9. In an emergency situation, what gland secrete hormones that cause all of the following: increased heartrate, increase blood sugar, increased blood pressure, and reduce the flow of blood to the stomach?
10. Which hormone is associated with being asleep or awake?
